

High-Risk COVID-19 Patients May Avoid Hospitalization with Monoclonal Antibody Treatment

Eligibility

Patients may be eligible for treatment with monoclonal antibodies if they are an adult or pediatric (age 12 years and older and ≥ 40 kg) patient, have experienced the onset of mild to moderate symptoms of COVID-19 in the last 10 days, have tested positive for COVID-19, and have one or more of the following high-risk factors:

- Age ≥ 65 years of age
- Obesity or being overweight based on CDC clinical growth charts
- Pregnancy
- Chronic kidney disease
- Diabetes
- Immunosuppressive disease or immunosuppressive treatment
- Cardiovascular disease or hypertension
- Chronic lung diseases
- Sickle cell disease
- Neurodevelopmental disorders
- Having a medical-related technological dependence (for example: tracheostomy, gastrostomy, or positive pressure ventilation not related to COVID-19)

Early Action Is Vital

Early testing, identification, and referral **within 10 days of symptom onset** are vital to access monoclonal antibody treatment.

How to Find Infusion Locations

Visit <https://combatcovid.hhs.gov/hcp/resources> or call 1-877-332-6585 for English, or 1-877-366-0310 for Spanish. Contact the infusion location(s) to learn their referral procedures and whether they are accepting new patients.
